Bible Lessons.

A+B. I. What do you know of Moses as a boy at School?  
 When Moses was at School in Egypt he probably  
 learnt Greek Latin and Sans, and perhaps repetition  
 & some science. He also learnt about medicine  
 and gymnastics. He learnt also the history of the  
 country when he was a little boy in Egypt. He  
 was very brilliant and clever and learnt  
 many things. He learnt to rule, he also learnt  
 to write many sorts of writing when he was a  
 little boy. He learnt about God from his  
 mother & father. Later he learnt to be a  
 shepherd.

2. Tell about Moses and the Burning Bush, or about  
 Moses and Aaron.

When Moses was looking after Jethro's sheep, his  
 father in law, the priest of Midian, he was one day  
 walking when he came to the mountain side of God  
 even unto Horeb. And he saw a bush burning and  
 yet it was not consumed. And Moses said I  
 will now turn aside and see this strange  
 sight why the bush is not burnt. And when God  
 saw that he turned aside to see he called Moses, Moses  
 and he said "Here am I". And God said "I am  
 the God of Abraham, the God of Isaac and the God of  
 Jacob, your forefathers. And God said to Moses  
 "I have something to tell you. The children of Israel  
 are in the hands of Pharaoh Ramesses II, and I want  
 them back to serve me and wicked Pharaoh will not  
 let them go. Therefore I will make him let them  
 go, and ye shall speak to him, and take a rod with

with thee. Then God gave Moses a rod. And God said "Cast it upon the ground and it shall become a serpent, and it did. And God said also." Put thy hand into thy bosom and it shall become white with leprosy, and when Moses had done so put his hand into his bosom and took it out again it was white with leprosy. And God said, "Put it again into thy bosom and it will become all right. And he said "Do these things before Pharaoh that he may let the children of Israel go that they may serve me. But Moses said. "But I am not a good spokesman. Then God became wroth with Moses, and he said "You shall tell Aaron all these things which I said unto you, do so," And Moses did it.

II.

Tell about the wise men from the East.

I.

When Jesus was born in Bethlehem of Judaea in the days of Herod the King behold there came three wise men from the East to Jerusalem saying "Where is He that is born King of the Jews for we have seen his star in the East and are come to worship Him". When Herod the King heard these things he was troubled, and all Jerusalem with him. And when he had gathered all the chief priests and scribes of the people together, he demanded of them where Christ should be born, and they answered "In Bethlehem of Judaea for thus it is written by the prophet - For thou Bethlehem in the land of Judah art not least among the princes of Judah, for out of thee shall come a governor that shall rule my people Israel".

Then Herod commanded that the Babe should be killed but to the wise men he said "Go ye and find the young child that I may worship him". But God warned them so go home by an another way for Herod meant to kill the young child. So the wise men worshipped the Child with myrrh and gold and frankincense, and when Herod saw that he had been outwitted he was wroth and in a terrible rage, and commanded that all the little boys under two should be killed, intending that Jesus was one. But God warned Joseph in a dream to go away so they went away but most of the little boys were killed.

2. Tell about the healing of the leper, or of the man who came through the roof.

One day when Jesus was out walking he met a man with the leprosy. and the leper said "Please cleanse me, O Lord" when Jesus saw that the man was faithful "Be thou cleansed" he said, and immediately he was. And Jesus said unto the leper "Do not tell this: I have made thee clean, but go unto the priest that he may know that thou art clean."

A.

Writing

Write a line of poetry from memory.

O what can I do for you  
all you Big Steamers.

Tales

(Pilgrims Progress not studied)

- 2 Tell how Ulysses invented the horse of tree, or how he escaped from the Island of Calypso

When Ulysses saw that it was no good to take Troy by force he thought they'd better take it by cunning, because the prophet Calchas said he'd seen a strange thing. A hawk wanted a fox, but the fox flew into a cave, so the hawk could not get at it. So then the hawk waited till the fox came out and then pounced upon it. Then he thought this was a lucky prophecy, because they thought "the hawk got the fox by cunning, so now perhaps we can take Troy by cunning". So they got the carpenters to build them a big wooden horse, so that they might put men inside it. Then they put men in it, and one of them was Ulysses & another was Menelaus' Helen's husband before he was taken away. Then they arranged what they should do. They had once stolen a stone which was called the luck of Troy, they decided to say that they were giving this horse to the gods because they had stolen the luck. This was the idea arranged, one man should stay in the camp and tell this story and the others should sail away to a little island near. The other men who had planned it all were to go into the horse. Then when they found the soldier

who had been left hiding away, they would ask him why he had been left there and he would tell the Trojans, that the Greeks had given up all hope of taking Troy (but this was a lie) and had gone away. Then he was to say also that he had killed Ulysses' brother and Ulysses had left him there for a punishment, and if they asked what the horse was for, he was to answer that when they had taken the luck of Troy the gods were offended and this was to please the gods.

So they did all this - In the night Paris, for that was Helen's husband now came down and called Helen to come, and Helen called "Menelaus, Menelaus" for he was called 'echo' for he could imitate people's voices. Of course the horse was fast outside the town then the Trojans drew the horse into the city, and women and children helped too. When it was night the Greeks opened a little door that let them out of the horse and opened the gates of the city to let all the <sup>other</sup> Greeks in for they had only gone away to pretend. Then there began a fierce battle and many people were killed, and in the end Paris was killed & so Helen went back to Menelaus & they sailed away home.

# English History

A.I. What do you know about Captain Cook in Australia?  
or, about how Lord Roberts saved the guns at Delhi?

Captain Cook discovered Australia somewhere about 1780, and Tasman just sailed round the island sometime before Cook. And Cook called one bit Botany Bay because there was such a lot of Botany there, flowers and trees and that sort of thing. Then he invited the native Jack and drank the King's health.

Having Australia was a useful thing, because we had lost America, because convicts used to be sent out to America first, but now we had lost America we had to send convicts out to Australia.

Then Captain Phillip brought out convicts there, and afterwards made them build houses and plant vegetables and flowers to make it look cheerful.

Captain Cook discovered New Zealand too.

2. Tell a story about the Duke of Wellington as a boy, or about Sir Joshua Reynolds.

When the Duke of Wellington was a little boy he went to a little preparatory school & then went to Eton. When he was at Eton with his brother one <sup>day</sup> they took some marbles from their playfellow who was going home with them. Their schoolfellow, not being very strong got the

1. worst of it. His little sister, a little older than himself when she saw her brother in this sad plight, she bravely joined in the battle Arthur seeing what a sorry part he was playing gave back the marbles and ran away so that she might not see that he was crying with shame and disgust at himself.

Describe a Compass. What does it tell us?

A.I.

A compass is very useful because when you go on sea the compass tells the steers of the ship north south east or west, or all the points of the compass. Of course in the older days, it was very difficult to find a ship in day because they had not a compass.

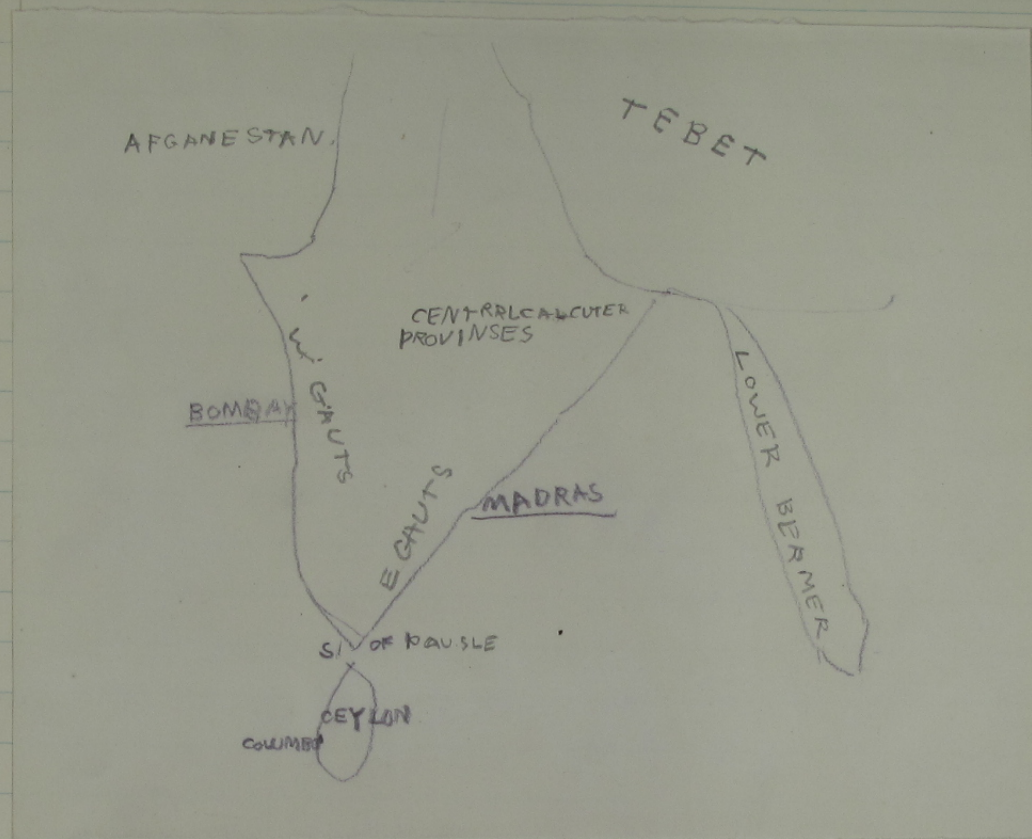

A compass is a round thing, it has 32 points, but north, south, east, & west, are the most important. It has a little needle which points north. You can get compasses, big and little and some of the big ones are very big.

Sometimes a compass is made of cardboard

I did the compass all myself, with a cup and ruler

- Can you draw the shape of India? What do you know about (a) the climate (b) the River Ganges?

a.

In some parts of India the climate is very hot but higher up in the mountains it is warm but not too hot. Some seasons are wet and horrible and it thunders, but others are quite nice. The Equator is not very far from India as you see on the map of the world. India is just a little higher up than Africa.

b.

The Ganges river and the Brahmaputra are two of the biggest rivers in India. Benares, you see, is

on the river Ganges. They think it is a holy river  
and go down to bathe in it every morning. And  
when they die, they are burnt and their ashes  
are thrown into this river. Benares is a city of  
temples and Calcutta is a city of palaces on the  
Ganges. It is a fairly dirty river in some parts  
because the ashes of the people make it so dirty  
but in other parts it is quite clean.

A+B.1

Describe two kinds of wild fruit you have found  
and two birds you have watched.

## The Blackberry

One of the wild fruits I found was blackberries. It's pleasant to eat but when you find them red they aren't ripe then. The biggest you generally find is almost the size of a shilling. But not blackberry which is not ripe is rather like a raspberry. It grows on thorny bushes so of course it isn't very nice to pick unless you have gloves on. Blackberries also make very good pastries, puddings if they are cooked well, or sometimes you make blackberry jam which is very nice, and you can also make blackberry jelly.

## The Acorn

Acorns are nice things to have. You can eat them but they are not very nice. Also it is nice to play with. One can make little things for dolls houses out of them like a teeny tiny cradle. An acorn is shaped like a tiny egg very pointed at the end though. If you plant an acorn, after lots of years it will become a big oak tree, if you leave it long enough. An acorn grows on a hump among the leaves. To keep it on the hump it has a little stalk with a cup in which it grows. At the other end which isn't fixed on it has a little point, and I think that is all about it.

## Two birds you have watched

### Robin

The Robin is a nice little bird, for if you feed it every day, it just crumbles out on the

wouldn't till they sometimes get quite tame  
 The Robin is shaped rather like a chaffinch  
 and has a little red breast and then a speck  
 of white. The robin has a fairly long beak about  
 half the size of a flycatcher's, and it's very pretty.  
 A robin feeds on worms and other insects &  
 crumbs also as I've just said.

The eggs I think are blue with spots.

### The Rook.

The rook is a black bird with a yellow beak.  
 It's a fairly big bird and it sometimes holds  
 a parliament. It goes in a tree with lots of  
 other rooks round it and he goes on saying  
 "Caw, caw, caw, caw," till it comes to the end  
 of the parliament. Rooks eat worms like robins  
 and other insects too. Crumbs they also eat.  
 The Rook flies slowly and fairly low.

## A.2. Tell about "The nursery in the flower pot"

There was once a pair of tits who saw a big flower pot. And they thought "This would make a nice resting place for us" and so they made their nest in this flower pot. (The man who wrote this book gave strict instructions not to touch the nest) -

There was a hole in the flower pot, in the bottom, for it was upside down, and they flew in at the hole in the bottom, and used it to come in and out by. Then they made their nest in the pot, and laid some eggs and the little birds came out of the eggs.

I. A.

I. 3 Boys earned  $2^s \cdot 4^d$ ,  $3^s \cdot 7\frac{1}{2}$ , and  $4^s \cdot 9\frac{1}{2}$   
 They then shared it equally. How much would  
each receive

$$\begin{array}{r} 5 \text{ " } 4 \\ 2 \text{ " } 4 \\ 3 \text{ " } 7\frac{1}{2} \\ 4 \text{ " } 9\frac{1}{2} \\ \hline 10 \text{ " } 9 \end{array}$$

$$\begin{array}{r} 3 \overline{) 10 \text{ " } 9} \\ 3 \text{ " } 6 \text{ Ans.} \end{array}$$

II. A wheel is 6 inches round. How many times  
would it turn in going 9 feet 6 inches.

In	1	foot	it	will	turn	round	2
"	2	feet	"	"	"	"	4
"	3	"	"	"	"	"	6
"	4	"	"	"	"	"	8
"	5	"	"	"	"	"	10
"	6	"	"	"	"	"	12
"	7	"	"	"	"	"	14
"	8	"	"	"	"	"	16
"	9	"	"	"	"	"	18
"	6	ins.	"	"	"	"	1

Ans. 19 times

3. A grocer divides 6 LBS of tea into 4 B. packets. How many packets will there be?

1	LBS.	is	=	to	4	packets
2	"	"	=	"	8	"
3	"	"	=	"	12	"
4	"	"	=	"	16	"
5	"	"	=	"	20	"
6	"	"	=	"	24	"

24 packets Answer.
